(57) Abstract

**PROBLEM TO BE SOLVED:** To provide a facsimile terminal by which a user can confirm contents of a plurality of image data stored in a facsimile terminal main body, select the image data desirably to be sent according to an instruction from a slave device, and transmit the selected image data from the facsimile main body.

**SOLUTION:** When information stored in an image storage medium and various control commands from a controller 24 are given to a cordless control circuit 217, the information and the control commands are sent to the slave device 3 via an antenna 218 as an electromagnetic wave. Thus, the facsimile main body 2 can provide information on the basis of a plurality of image data as thumbnail data or voice, the user selects image data desirably to be sent and faxes the selected data through a telephone line network 21 according to the instruction of the slave device 3.
